**MIRACLE  
BODY**

**Miracle Body = Our Miracle Body**

**Our Body –**

## **The Miracle We Take for Granted**

(In Psalm 139, King David is praying to God and David says, “I am fearfully and wonderfully made.” This speaks of the care and attention with which God has made us. By now, God has made billions of human beings, but we're not mass-produced. We're not churned out in a factory in a mechanistic way.)

That's what Google said on 3 Jan 2022 = Thanks Google!

The original text was added to The Answerer website by Colin Groom on 1/10/2022. So Google and Colin were thinking along the same theme at about the same time as was Peter Harris.

Let's put a few more thoughts on this very personal subject – **just FOR YOU.**

**Peter shares:**

I recently read a book titled:

**THE BODY**

A guide for Occupants  
by BILL BRYSON

Two cover pictures  
as found on the internet.

It sure was a 'can't-put-it-down' sort of book. It is a 'Best seller' too. Bill does not attribute the making of us to God - but I do. Bill is a highly respected writer and a very popular man. He writes so well. ALL SHOULD READ IT!

I simply put before you a few descriptions as to how our bodies are made up that I did not know about, but was amazed by how it was. Why?

At the finish of the book (it was on loan) I was amazed that my Mum lived to 100 years and I am now 88. *(Peter wrote this for YOU in 2022, so you do the maths!)*

In the 100 years that my mum lived, the work that her heart did – if it was added up, the ‘work’ or ‘effort’ then that combined force would have lifted a one-ton weight 150 kilometres into the sky. Phew! (It would have gone past Richard Branson’s space flight!) >>>

Also: An adult human being has about 25,000 km of blood arteries, veins and capillaries (very thin veins) to transport blood to the right places, at the right time and place to keep us warm, or to cool us down.

In a cell (not a drop of blood) there is about a metre of DNA. **DNA** is ‘**deoxyribonucleic acid**’ called chromosomes and these include our genes. Somehow these combine together to decide our eye colour, eye shape, nose shape and size, skin and hair colour, and millions of other features that make us look just the way YOU do. They make our bodies work and change as we live our lives. The DNA is composed of - as Bill says: ‘**exquisitely fine strands**’. These are so fine that it would take a million of them to be as thick as a human hair. If, somehow these DNA strands in all of our cells were put end to end (in a long line) it would stretch out to Pluto...about 1.8 billion km away. (1,800,000,000 km). >>> Did God design it?

**Antibiotics:** These are truly wonderful lifesaving drugs and have saved millions who would otherwise have died. **BUT** - stupid people are abusing them and using them when they should not. **RESULT:** There are quite a lot of ‘Antibiotic resistant bugs’ that, sometimes, cannot be killed. So possibly in 20 years, antibiotics may be of much less effectiveness and millions could die because of this stupid **over-use**.

Antibiotics may also kill gut-bugs ‘good-bugs’ leaving us vulnerable to severe sickness. God put millions of ‘Gut Flora’ (good bugs) in our digestive system that keep us healthy, fight off infection or sickness, as well as help to digest our food! Please believe that.

Ps: The book is not Bill’s opinions. He liberally quotes maybe thousands of experts in the book: People from major research places, major hospitals and people who work only on one problem and so ‘know their stuff’. All are good sources of knowledge about problems. **Try as I did, to start with - Google ‘how our eyes work’. Then because you then know your eyes do work - try ‘how our ears work’. And so since you proved that YOUR ears DO work ...**

I hope you will listen to my advice and so do read **THE BODY** book - it might save your life later!
