

## Alien Life Visiting Us

**Q.8** Suppose a craft from another 'Star' landed on our planet, beings, non threatening, joined with humans, learnt to speak with us & after six months went home one night, what sort of report might they = give their leaders about earth? Well, maybe this has already happened? **OK, HOW DID WE SCORE?**

'Jacob's Ladder' - a stairway for walking from Kings Park to the Swan River, in Perth, WA. Fit people go the UP-WAY! Jacob's Ladder was named after the famous biblical leader Jacob who was later re-named Israel = same as the country. **A ladder leading to & from heaven, featured in a dream, during his escape from his big-troubles. See Genesis Ch 28.**

Well, you might Wonder about 'who from Heaven came down', or think of movies of things landing softly, or not at all. (Hovering = that's impressive considering GRAVITY, eh!) Or the spectacular crashing of Alien Spaceships into the dirt, or ocean, or a city. **Have we** found their craft, their bodies, have we looked after them in 'secret hotels'? (To them it probably feels like a prison!) **Have we** made all the technological advancements all-by-our-own-brain-cells, or is it sadly-maybe-true that we have just copied theirs? Oh, if you do copy/cheat/plagiarise with your school assignments or in exams = *YOU get in BIG trouble!*

God in the Garden of Eden. God said Abraham's not-yet-born-sons to be 2 nationalities. God had dinner with Moses + 74 others on Mount Sinai 'on a Sapphire-blue pavement'. Then they went down & made a 'Golden Calf' = no-Wonder why He was angry with the 74! Did GOD look like that? **NO**: Cows are holy in India. 2023 = Chinese calendar year 4,721. Myan Calendar starts again = 2012 movie: No kids wanted to do their homework that year!

Who are all those enormous pictures for: The Nazca Lines> When the Spanish explorers arrived, the locals were very "surprised they came on-the-water-ships & **NOT SKY-SHIPS!**"

Dogon African Tribes give facts from the Sirius Star system: This tribe's stories gives precise location of a star system & phenomena NOT discovered by modern science until now!

Dogon's describe a third star in the Sirius system that has yet to be discovered, & gravitational observations might prove their claim to be true. *Close ~8.5 light years away.*

Since we ARE here & all the plants & creatures: ARE we the first/only-so-far planet with a integrated habitat, or ARE there many that we just haven't discovered yet? **We ARE trying!**

Earth-ZOO-Idea: aliens avoid us allow for natural evolution, socio-cultural development, & avoiding contamination, similar to people observing animals at a zoo. Pan-sperm-ia-Idea: seeds of life go/sent/propagate throughout the universe & simply start life anywhere it can.

Science writer Bryan Walsh: why haven't had/made contact:

1. Aliens want to talk to us but can't.
2. Aliens are smarter & Earth is too slow.
3. Radio signal 1st sent 1962. (Marconi invented in 1895.)
4. Scientists thought sending space messages ~ bad idea?
5. Aliens could be hiding from us.
6. Aliens leave us alone - until we pose a threat.
7. They are hibernating (in sleep-mode) at the moment.
8. We are living in 'outskirts' - where life is least located.
9. Advanced civilization can't last long enough. (*A warning*)
10. Climate-Change 'likely preventer' reaching star systems.
11. Search finding remains: maybe evidence of extinct ones.
12. Aliens live inside their respective planets = hard to see.
13. Aliens already visited Earth — just not recently.
14. Earth holds the only intelligent life in the universe? *But ...*
15. "We are convinced there must be life on other planets, or we wouldn't search for it."
16. Fermi: NO Earth-like planets outside our solar system = zero found 40 years ago.
17. NASA's planet-hunting Kepler Space telescope, 2009-18: found +2,000 exo-planets.
18. NASA NOW confirms +5,200 exo-planets & ~9,200 more are awaiting confirmation.
19. Chance: Look at exact part of space, at the right time? **So, lot's more jobs for you!**
20. SETI's monitoring system is guessing that aliens are trying to message us! **But how?**

Nearly all scientists believe that 'Oumuamua' - the 2017 'space ship, cigar, sausage or bread-stick' probably originates from outside our solar system. Particularly interesting = didn't follow expected orbit - had extra "non-gravitational force" acting on it.

**NASA** formed a 'Unidentified Anomalous Phenomena' UAP team in 2022. **Controversial**: A public meeting talked about the **harassment** that the team members have faced online, **For**: from people who are certain that aliens are REAL & have definitely visited Earth, & **Against**: those think it's ridiculous - government agency investigating claims of alien craft.

We know WHERE: 'Armageddon' = **Megiddo**, Israel. Christians know this is the place of the final battle, described in the Book of Revelation, New Testament: 'Another-Christ' will lead the Kings-of-earth in a war, as the 'Real-Christ' comes back/**down** to save us all. Panic a little less = **Good future** => good 1,000 years. We don't know exactly WHEN: the news is that we get clues, changes, marks, signs, warnings, etc.

**So if we did**, 'entertained angels' or did a 'WWJD' challenge: 'What Would Jesus Do?' Whether we know if we did well in the 'mystery guest challenge' & **PASSED the TEST?** Maybe the very **feeling** we get that 'someone cares how we behave, that someone is watching, that there is a test/evaluation' & that there is more than just this our one-lifetime: THAT makes more sense why we care how/where we bury our people to 'Rest in Peace.' WE SEEM TO CARE a lot about other people, plants, animals & the whole environment.

The alternative is that we, like locusts 'Greedy-Grasshoppers' = only consume everything, then leave this planet destroyed, going off to find somewhere else to do the same to next? Our houses & cities seem sterile: keep our-environment controlled like a spaceship & keep other life-forms OUTSIDE! Are we behaving as if WE don't BELONG here? **Think?>ACT!**
