

Where Are You Going?

(Revelation 21:2 NIV Bible: “I saw the Holy City, the new Jerusalem, coming down out of heaven from God ...”

Imagine you, the ‘Stig’ - the Stud; not of the best-man-riding-the-best-horse=STUD variety, but see the above best/first-driver of the most modern car/rocket/space-technology version! Who is not identified ... so that you, YES YOU, could imagine yourself doing it! Maybe, it was you and you are keeping this a secret! Maybe it’s me, but I am much older, so imagine/remember Indiana Jones; when he was a part-time lecturer and was sometimes ‘away’ busy doing real **archaeology!** **Oh, if they only knew what their teacher was doing ... for them!** (Saving their world) (Like Me = working my fingers to the **bone!**)

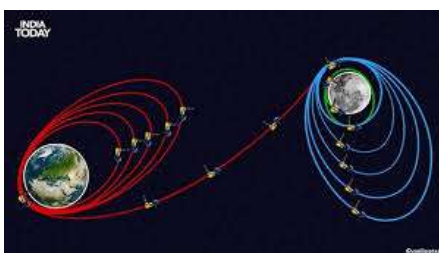

The ‘Stig’ = You push on the brakes ... come out of hyper-space-speed-drive ... check that the planet looks like the one on your map/picture screen. Therefore someone had to know that this is what it looks like and where to go, & that it would be specifically here on arrival: Instead of crashing into it, appearing in the core of it, or just a bit further away needing a boring bit of space-slow-travel to get closer. Of course not so far away, as to get smashed in the back-end by Mars in its natural orbit. Imagine the Insurance claim = they would put the blame on YOU pulling out into traffic in the truck-lane/I mean the planet’s-priority-path. IE: Mars can’t stop, slow down or evade you, etc!)

Some ‘out-there-ideas’ we are benefitting from in this modern age! Direct result of people who ‘went-out-of-their-minds’ (not crazy) to explain their ideas/imaginings/mind-travels to the stars. They put their minds to it = we are now doing! **How brilliant WERE they ... to convince governments & industry to start building space-rockets instead of war-ones.**

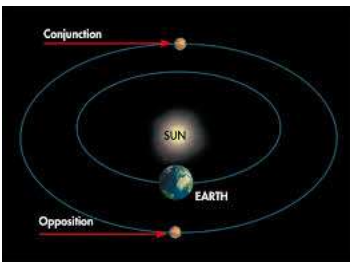

“It is impossible ... only ... until ... it was done!” (Thanks Hyundai car history)

How hard is it - to pass a football while running - to your team mate who is also running? Olympians stand and try to shoot a ‘fast-flung-clay-pigeon’ aiming at where it will soon be! Surely kids have had a ball thrown, for them to run to catch it & to splash-land in the pool!

How does the Stig get to the Moon, Mars or anywhere? Here is a diagram of how they get to the moon. Speed-up loops help give a gravity-assisted boost. So maybe your radio signal is squeaky on approach and slow-mo as you increase your speed faster = **“Hi(pitch/sound) MUM,”** then **Bbyyye Mmmuummmmmmy as you go away.**

Passenger: “Are we there yet x 5?” Pilot: “Nup, haven’t even gone anywhere yet x 5!”
Passenger: “Surely we can land now x 5?” Pilot: “Nup, haven’t slowed enough yet x 5!”

To get to Mars with our fastest rocket, we 'shoot-the-gun' about opposite to where we see it, say at Conjunction = to 'hit-it' at Opposition (when it is exactly opposite Earth): because that is how long it takes the 'bullet/rocket' to get there! Imagine us sending exactly monthly supplies of food/medicines/oxygen/water. Some would arrive 6 months later, stretching to a year later.

Consider also that: we are being tugged along by the Sun, as it moves through our tentacle of our spiral arm of our Milky Way galaxy, which is also moving through space = watch out for Andromeda Galaxy crashing/merging or passing through ours? So exactly, where, to point the 'hyper-space-drive' spaceship?

We are in an expanding universe: <Left 'progression-spheres diagram' is better than the right 'bell-expansion'> version or a 'shot-gun' model, both are multiple stages overlapped time models.

Many movies = well-known dramas (acting/pretending) 'teaching-us-science' about 'real' **Multiple Universes**: Also parallel universes, repetitive life experiences, or swapping near-identical-realities, + strange life-forms!

The bigger the universe or 'reality options' promoted as **real** = that are truly imaginary (prove me wrong) ...sadly, the smaller/impersonal/unimportant we **feel!** **"If we're made from matter, we just don't matter?"**

Then that begs the question about Heaven: Is it REAL? Where is it? How do we get there? It is as if we are certain that there is something/some-other-ones out there & we are spending a lot of the world's money, time & resources to find some clue/signal/message from the stars or universe! But what if we HAVE the answer, or rather have been-answered. Not by me, but BY God – to YOU! He has provided the Bible with supporting evidence, history, archaeology, traditions + life-changed living examples of impossible-by-any-other-suggestions – so that FAITH or BELIEF is so amazing! Even the average person thinks or says, with a bit of hope, "God WILL let me into heaven – because I am ok, I have lived a good life, you know I haven't killed anybody, or done anything bad!"

In magazines, newspapers & the web, people read 'horror-scopes' = the word should be warning enough! I think that writers must be reading the star-shapes the wrong way around: If one starts with the Virgin-birth & goes the other way ending with the 'Lion-King' - it tells the story = like stepping through the Bible history piece by piece in the sky!

Look to the Wonders of the heavens: they help us imagine the life God intends for us & everyone. Then let us put the same effort, money & creativity into making food-bombs deliver the needs of the starving. Medicine-cures for the sick. Seed-bombs to re-plant land we ruined - then avoid fixing. Then make movies about kindness & pleasant childhood experiences for all to desire/copy/do! Who said it has to be as it is? Who made the plan the world is following? What is their outcome?

If there is no god – maybe we need to invent one! But if the Bible-God is real, why does it seem many want another-one, any-other-one-BUT-NOT-that-one? ***Maybe we don't go anywhere, but God comes to us!***
